

Global Friendship Through Space Education

PARTNER SCHOOL SCIENCE PROGRAM PROPOSED 2009-2010 CURRICULUM

The topics below are recommended for all PSSP teachers to work on with their partner schools. This is a recommendation and is not mandatory. Most of the topics have been used in the past by PSSP teachers. If we have many schools working on the same topics, we will be able to facilitate communication between many different schools.

Please follow these guidelines:

- Before you start to work on a topic, please make sure you and your partner school choose the **SAME** topic.
- There might not be videoconference opportunities for all topics. Make sure the topic you have chosen qualifies for a NASA videoconference. Choose one or two topics that we can register for the NASA videoconference. You can arrange your own PSSP schedule with your partner school.
- Give detailed information to Mr. Tolga Yildirim and Mrs. Marilyn Anderson about your own PSSP schedule that you and your partner have created.
- Working on all topics below is not mandatory.
- Before you start to work on a topic with your partner, **check its availability on the web page.**

Available Topics as of September 30th, 2009

1. Directive: Mapping the Moon with WALL- E
<http://dln.nasa.gov/dln/content/catalog/details/?cid=642>
2. The Solar System and Beyond
<http://dln.nasa.gov/dln/content/catalog/details/?cid=577>
3. Human in Space
<http://dln.nasa.gov/dln/content/catalog/details/?cid=570>
4. Toys in Space
<http://dln.nasa.gov/dln/content/catalog/details/?cid=507>
5. Rocket Science
<http://dln.nasa.gov/dln/content/catalog/details/?cid=293>

*If you have any problems or questions, please contact: Mr. Tolga Yildirim or Mrs. Marilyn Anderson.
